

UKULIMA KENYA

Building Farmers. Growing Futures.
Agricultural Consultancy & Solutions Provider

ABOUT US

Who We Are

Ukulima Kenya is a leading agricultural consultancy and solutions provider with over ten years of hands-on experience transforming farming enterprises across Kenya and the wider East African region. We work at the intersection of practical farm management, livestock systems, agribusiness development, and capacity building — offering farmers, cooperatives, NGOs, and private sector investors a single, trusted partner for end-to-end agricultural solutions.

Our work spans the full agricultural value chain: from farm infrastructure design and feedlot establishment, to livestock sourcing, silage production, animal nutrition, veterinary health support, and farmer training. We have delivered projects across diverse agro-ecological zones including arid and semi-arid lands (ASALs), highland farming belts, and pastoral corridors — working alongside smallholder farmers, commercial enterprises, and development organisations alike.

What sets Ukulima Kenya apart is our commitment to practical, context-specific solutions. We conduct thorough farm assessments, understand the local market dynamics, and design interventions that are economically viable and sustainable for the long term. Our team combines academic rigour with deep field experience, ensuring every engagement delivers measurable results.

Our Vision

To be East Africa's most trusted agricultural solutions partner — transforming farming into a profitable, sustainable, and modern enterprise.

Our Mission

To empower farmers through innovative consultancy, quality inputs and equipment, modern livestock solutions, training, and reliable technical support that improve productivity, profitability, and food security.

What We Do

Ukulima Kenya delivers integrated agricultural services that address the full lifecycle of a farming enterprise. Whether you are establishing a new commercial feedlot, strengthening your herd health programme, or building farmer capacity in a development project, our team has the expertise and field presence to deliver.

Livestock & Animal Health

- Dairy farm consultancy and herd management
- Feedlot design, establishment, and management
- Livestock procurement
- Animal nutrition and custom ration formulation
- Veterinary health programmes and vaccination schedules
- Silage production, preservation, and storage

Infrastructure & Systems

- Feedlot pen and housing construction supervision
- Irrigation system design and installation
- Water trough and feed bunk fabrication
- Farm infrastructure planning and BOQ preparation
- Farm management systems and record-keeping setup

Farm Production & Inputs

- Certified seed supply (fodder, legumes, cereals)
- Agricultural inputs supply and advisory
- Fodder establishment
- Farm equipment supply and mechanisation
- Crop production advisory and soil management

Advisory, Training & Capacity Building

- Agribusiness consultancy and market systems development
- Farmer training and hands-on field demonstrations
- Smallholder group and cooperative strengthening
- Project planning, implementation, and M&E support
- Feed and fodder market systems development in ASALs

Our Approach

Every engagement begins with a thorough on-site assessment. We design solutions that are technically sound, locally appropriate, and commercially viable — then we stay on the ground to ensure implementation succeeds. Our team does not disappear after the proposal; we are partners in your farm's growth.

Meet the Leadership Team

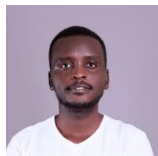

Our team brings together specialists in livestock production, agronomy, veterinary science, project management, and agribusiness development. Each member carries deep field experience and a genuine commitment to farmer success.

Cyprian Nambisia

Lead Consultant — Livestock & Agribusiness

A seasoned agricultural consultant with over 10 years of experience in livestock systems, feedlot management, and agribusiness development across Kenya and East Africa. Leads client engagements, oversees technical strategy, and manages key stakeholder relationships with NGOs, development partners, and private sector clients. Holds expertise in market systems development, value chain analysis, and ASAL livestock production.

Dan Onchieku

Project Manager

Responsible for planning, coordinating, and delivering Ukulima Kenya's field projects on time and within scope. Brings strong experience in agricultural project implementation, monitoring and evaluation, and team coordination across multiple counties. Manages relationships with community groups, cooperatives, and implementing partners.

Joseph Owino Odera

Veterinary Officer & Herd Health Advisor

A qualified veterinarian with field experience in livestock health management, disease surveillance, and herd performance monitoring. Leads veterinary interventions including vaccination programmes, deworming, reproductive health, and nutrition-linked health challenges. Works closely with pastoralist communities and commercial cattle operations.

PAST CLIENTS & ENGAGEMENTS

Selected Experience & Partners

Ukulima Kenya has delivered projects and services for a diverse range of clients across the non-profit, development, and private sectors — from large international NGOs and government-linked programmes to smallholder cooperatives and commercial farms.
